[Profile](#) | [Git](#) | [LinkedIn](#)

Full Stack Engineer with 3+ years of experience designing and owning scalable, high-reliability systems in the payments domain (BBPS, FASTag, e-Mandates, transaction lifecycle & reconciliation). Strong believer in understanding and reading code deeply before building on top of it, while actively leveraging AI tools to ship smarter.

## EDUCATION

### Harcourt Butler Technical University (HBTU), Kanpur, UP

2018 - 2022

B.Tech. (Computer Science and Engineering) | CGPA - 7.85 / 10

**Coursework:** Data Structure, DBMS, Operating System, Computer Networks, Software Engineering, Programming language (C, C++), Algorithm analysis.

## WORK EXPERIENCE

### Software Development Engineer (Blackbuck)

Mar 2025 - Present

Payments | FASTag

- Led end-to-end architecture and delivery of **BBPS integration** (HLD → production), enabling third-party FASTag recharges; ensured scalability, regulatory compliance (NPCI), and seamless settlement flows.
- Designed and implemented **AutoPay (e-mandate) system**, integrating Juspay for mandate creation, tokenization, and recurring payment orchestration with high reliability.
- Optimized ledger download (1L+ transactions) and reconciliation pipelines, improving operational efficiency.
- Strengthened payment reliability through robust error handling, idempotency controls, retry mechanisms, and transaction lifecycle management.

### Software Development Engineer (Paytm)

2022 - 2024

Tech-Merchant team

- Developed RESTful APIs for web services (Merchant Dashboard) that handled over 0.5 million requests per day and implemented new features for customer-facing web application.
- Engineered successful transition of data serving from traditional database to Elastic Search (ES) to optimise backend processes, reducing response time by 25%.
- Implemented and updated the polygon territory management system, improving the precision of agent assignment using GIS functionalities.

### Software Engineer Intern (Paytm)

January - July 2022

As a back-end intern, compiled and maintained operational excellence reports, providing key insights into system efficiency and worked actively in resolving software defects, ensuring the reliability of system components.

## ACADEMIC PROJECTS

### ◆ Twitter Clone: Scalable Social Media Platform ([Project link](#))

Designed a simple Twitter clone built using Spring MVC, Java, HTML, CSS. It allows users to register, log in, post tweets, retweet, and view their profile. Spring MVC for the back-end architecture.

- **Tech Stack:** Spring MVC, Java, MySQL, HTML, CSS

### ◆ Library Management System ([Project link](#))

Developed a dynamic user-friendly Book Store website featuring a homepage showcasing featured books, user sign up functionality and cart system allowing users to add book and complete orders online.

- **Tech Stack:** HTML, CSS, Javascript.

### ◆ Advanced Product Recommendation System ([Project link](#))

Engineered a content-based recommendation system. Applied Natural Language Feature Engineering using NLP Models to recommend similar products on e-commerce websites by using Amazon product advertising API.

- **Tech Stack** - Python, BoW, TF-IDF, Word2Vec, NLP

## SKILLS

- Programming languages: C/C++, Java, Python
- Full Stack Development: HTML, CSS, Javascript, Java, Spring MVC (framework), AWS, kafka
- Database: MySQL, Dbeaver, Elastic Search, Hibernate, Postgre, NoSql
- Developer Tools: IntelliJ, Git, Postman, Data Pipeline CI/CD, Bit bucket, JIRA, wiki, Jenkins, Kiro, Windsurf

## ACHIEVEMENTS/ CERTIFICATIONS

- Certification of 'Advance Diploma in Computer Applications'
- Earned the '**Rising Star Certificate**' for my contribution at Paytm.
- Solved 300+ coding problems on various platforms.
- Technical content writer from Sahu Technologies.
